

MIPP Software/Analysis meeting

Pass 4b

Holger Meyer

Fermilab

7/25/08

Outline

- Pass 4b is in progress
 - some delays this week due to scheduled and unscheduled grid outages

Pass 4b

- Using R08.07.15
 - No changes needed in MIPPTPCSummary. Jon had already added everything.
- Some more data was processed, but there were some problems on the grid
 - not caused by or related to MIPP
 - Stken upgrade on 7/24 all day: Enstore/dCache down, pnfs unmounted
 - GUMS server/gPlazma problems caused by another user slowed down job submission
 - Today is [System Administrator Appreciation Day](#):
 - Overall fermigrid uptime, reliability, and problem response times are good. Thanks, SysAdmins!
- I will let Mark and others know as soon as I have some NuMI MC processed.
